

Visualizing and Predicting Heart Diseases with an Interactive Dashboard

Team ID	PNT2022TMID18098
Project Name	Visualizing and Predicting Heart Diseases with an Interactive Dashboard

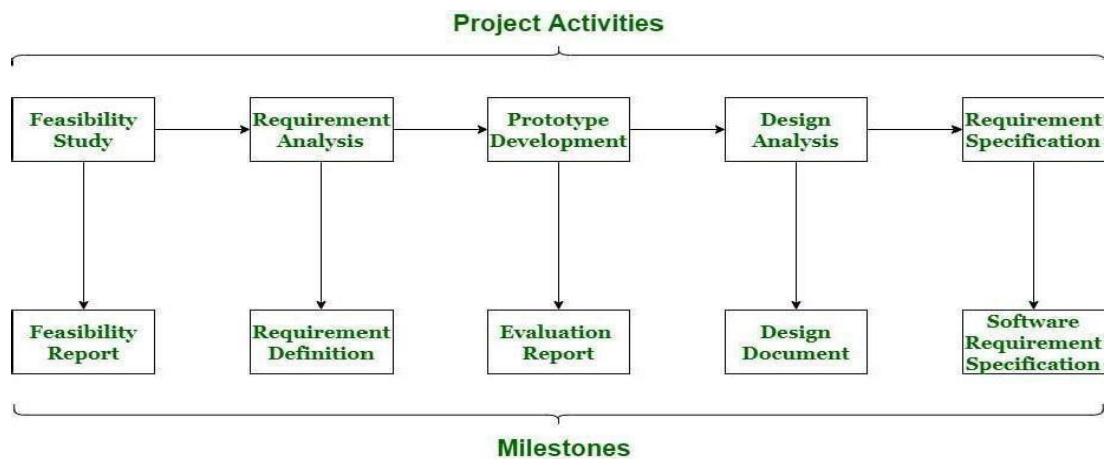

What is a project milestone:

A milestone is a point in time during a project that denotes a change or stage of development. Milestones are important components of project management because they highlight significant events and chart the progression of your project plan.

Throughout the course of the project, milestones serve as compass points to keep you on course. You are merely performing observation activities rather than actually following the right path for your project, which is not the same as project milestone lagging.

What Is a Milestone Schedule:

A milestone schedule, often known as a milestone chart, is simply a timetable that divides a project plan into main segments using milestones. It is utilised because it is straightforward when project managers or sponsors need to give stakeholders or team members a summary of the project timeline without going into every single detail.

Various Project Activities and Milestones

Milestone and Activity List:

TITLE	DESCRIPTION	DATE
Literature Survey and Information Gathering	Literature survey on the selected project & gathering information by referring to technical papers, research publications etc.	5.9.22
Prepare Empathy Map	Prepare Empathy Map Canvas to capture the user Pains & Gains, Prepare list of problem statements	30.9.22
